**\*\* Blended Learning** - Blended Learning is a combination of face to face instruction with online content, discussions, assignments, and activities.

This involves the use of a Ministry of Education online learning management system that can be accessed anytime, from anywhere. It will allow students, among other things, to:

- access course content online (students will need to have a computer and internet access)
  - submit assignments;
  - engage in enriching online discussions with other students;
  - share and collaborate on projects online;
- stay organized and keep up with their school work
